

Break-Even Autopilot (7 Days)

No New Tools. No Habits.

Stop silent profit fumbles. Stay busy, keep estimating the same way - just stop underpricing.

The one result

Break-Even Floor + Pricing Guardrail

In 7 days, we calculate your true overhead and

Turnover Scoreboard (delivered Day 7)

Break-even revenue: \$_____ / month

Minimum target per job: \$_____

Overhead recovery per job: \$_____

Why this matters

You can stay booked and still lose money if you keep giving away profit with silent turnovers.

Offense: 400 yards

Turnovers: TO TO TO TO TO

Result: Lose by 30

How it works (hands-off)

We plug into what you already use. You do not change your process.

- Connect bank/card, payroll, and QuickBooks (read-only is fine).
- We calculate your true overhead from real cash + payroll (works even if QBO is messy).
- We compute your break-even floor (minimum revenue you must collect).
- We install a pricing guardrail inside your current workflow (overhead line or quote floor).
- You receive a 1-page Scoreboard weekly. We handle exceptions.

7-day timeline + guarantee
